

# CERATA KWS

**CERATA KWS** is a beautiful red skinned white fleshed variety. This high yielding variety has a smooth skin with very shallow eyes. Cerata KWS is a cooking type B potato with slightly high dry matter. It is medium-late maturing and has high common scab resistance.

 TABLE/FRESH

 HEAT & DROUGHT TOLERANT

 WHITE FLESH

 ORGANIC

## Tuber Characteristics

- Tuber Shape Round oval
- Flesh Color White
- Eye Depth Very shallow
- Skin Color Red
- Skin Texture Smooth
- Dormancy Good
- Tuber Size Large

## Resistances

- Scab High
- PVY Medium-high
- Foliage Blight Medium-high
- Tuber Blight High
- Damages High
- Bruising High
- Nematodes - Ro 1

## Yield and Quality

- Yield High-very high
- Tubers per plant 12-14
- Cooking Type B
- Dry Matter 20%

## Remarks

- Resistance to Potato Wart Disease
- Good storability
- Slightly sensitive to silver scurf
- Requires lower Nitrogen fertilization
