

# Table Potatoes

The New Brunswick potato growers have a long history of supplying the world with a top quality potato. Built on generations of experience and very stringent agricultural practices, our producers offer the market only potatoes from Foundation or higher class seed potatoes. The use of the latest technology to effectively harvest and store their product is a guarantee of an excellent product. Careful handling and reliable delivery ensure the finest potatoes to our customers.

Most potato packing facilities in New Brunswick are certified under the Canadian Partners in Quality system. (C-PIQ) Grade, quality and consistency are monitored to insure safety. C-PIQ provides the consumer with a safe food product that is documented, traceable and assured.
